End of Season Reports: Farm overall heatmap

End of Season Reports

Orchard 7

Summary:

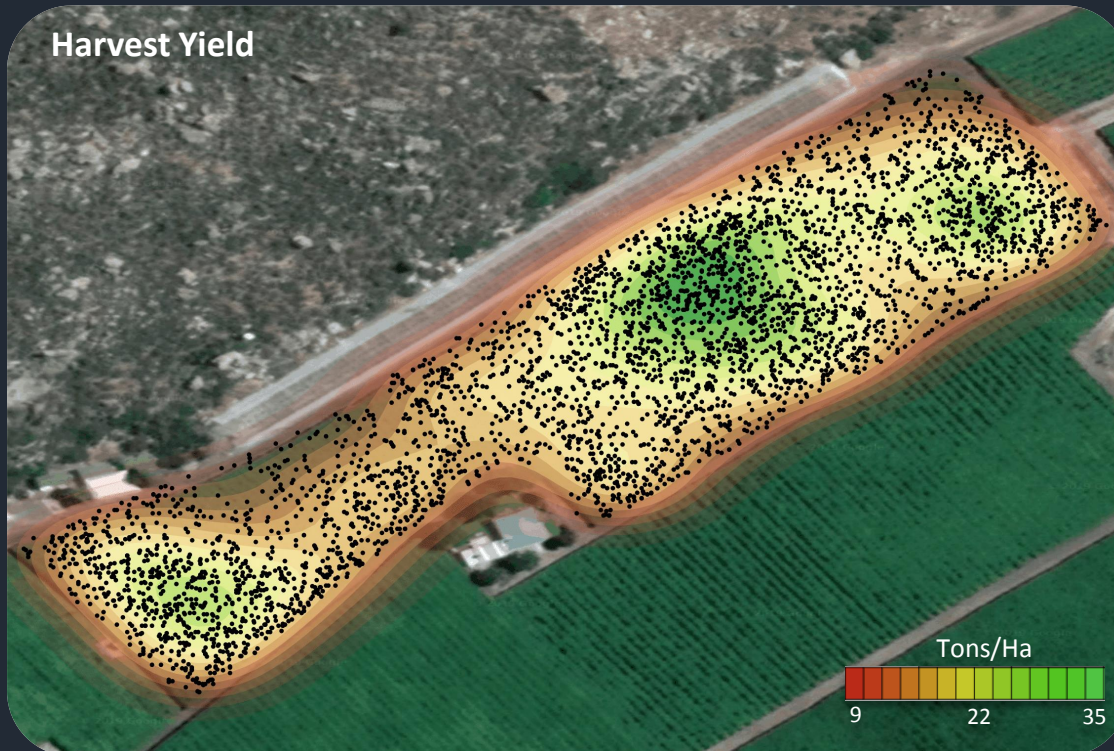

- Year Planted: 2011
- Size: 2.66 Ha
- Measured Yield: 5,909 crates; 50.23 tons
- Per Ha: 18.88 tons / Ha
- Cultivar Rank: 6th / 16
- Total Rank: 15th / 30

Remarks:

Good and balanced yeild through whole orchard. Total yield is average for this farm. North-Western corner underperformed and requires attention.

End of Season Reports

Orchard 23

Summary:

- Year Planted: 2008
- Size: 2.1 Ha
- Measured Yield: 4,633 Crates; 29.38 tons
- Per Ha: 18.75 tons / Ha
- Cultivar Rank: 8th / 16
- Total Rank: 17th / 30

Remarks:

Average yield per hectare. Part of orchard closest to water point shows that the water that goes into the orchard has a negative impact on the orchard yield. This shows an easy area to fix in order to improve the overall yield.

End of Season Reports: Pests and sickness

Pests marked:

-  White Lice
-  Fruit fly
-  Vinegar Fly
-  Codling moth
